

Preparing Photos for the Web Using Paint Shop Pro 7

This is a simple set of directions which will aid you in preparing your photos for the Internet.

1. Acquire a copy of Paint Shop Pro from the Internet. You can download a 30 day trial copy at <http://www.jasc.com/>. Install it!
2. Open your photo. I would suggest keeping all of the default setting and running your photo through the steps below.
3. Effects, Enhance Photo, and Automatic Color Enhancement, click OK
4. Effects, Enhance Photo, and Automatic Saturation Enhancement, click OK.
5. Effects, Enhance Photo, and Automatic Contrast Enhancement, click OK.
6. Effects, Enhance Photo, and Clarify, click OK.
7. File, Export, and Jpeg Optimizer.
8. Increase the compression value to 25 or 30, click OK.

You have finished!
